About Atreca, Inc.

Atreca is a biopharmaceutical company utilizing its differentiated platform to discover and develop novel antibody-based immunotherapeutics to treat a range of solid tumor types. Atreca's discovery platform relies on the human immune system to discover unique antibody-target pairs from patients experiencing an active immune response against their tumors. These unique antibody-target pairs represent a potentially novel and previously unexplored landscape of immuno-oncology targets and provide the basis for novel clinical therapeutic candidates such as ATRC-101, the company's lead clinical candidate. The company expects to file an Investigational New Drug application for ATRC-101 by the end of 2019 and to commence a Phase 1b study in multiple solid tumor types in early 2020.
