

Atreca Reports Third Quarter 2023 Financial Results and Announces Further Reorganization to Support Exploration of Strategic Alternatives

November 14, 2023

SAN CARLOS, Calif., Nov. 14, 2023 (GLOBE NEWSWIRE) -- Atreca, Inc. (Atreca) (NASDAQ: BCEL), a clinical-stage biotechnology company focused on developing novel therapeutics generated through a unique discovery platform based on interrogation of the active human immune response, today reported financial results for the third quarter ended September 30, 2023, and announced that the Company is implementing a further reduction in its workforce of approximately 40% while maintaining the necessary support to continue exploring potential strategic transactions and business alternatives.

"Since our founding, Atreca has leveraged a unique discovery platform to identify numerous antibodies binding novel targets in oncology, as well as infectious and autoimmune disease," said John Orwin. "We remain focused on advancing APN-497444 through preclinical testing and continue to believe that our approach has potential to unlock meaningful tumor targets undiscoverable by conventional approaches. Nevertheless, given current financial market conditions and the funding needs required to advance '444 and our other antibody-drug conjugate programs into clinical development, we have made the difficult decision to further reduce our headcount as we explore strategic alternatives. I'd like to thank all employees impacted for their contributions."

Third Quarter 2023 Financial Results

- General and administrative expenses for the three months ended September 30, 2023, were \$5.4 million, including non-cash stock-based compensation expense of \$1.3 million.
- Atreca reported a net loss of \$36.2 million, or basic and diluted net loss per share attributable to common stockholders of \$0.92, for the quarter ended September 30, 2023.

About Atreca, Inc.

Atreca is a biopharmaceutical company developing novel antibody-based therapeutics generated by its differentiated discovery platform, with a focus on antibody-drug conjugates (ADCs). Atreca's platform allows access to an unexplored landscape in oncology through the identification of unique antibody-target pairs generated by the human immune system during an active immune response against tumors. These antibodies provide the basis for a pipeline of first-in-class oncology programs led by APN-497444, an ADC targeting a novel tumor glycan, in addition to MAM01/ATRC-501, a clinical candidate licensed to the Bill & Melinda Gates Medical Research Institute for the prevention of malaria.
